

What is an Ignition Interlock?

An Ignition Interlock is a breath analyzer installed into a vehicle to prevent a person from starting the engine after consuming alcohol. The vehicle operator must take and pass a breath test before the vehicle will start.

If the driver registers a breath alcohol below the allowed limit the vehicle will start. Periodically, while the vehicle is in use, the device will require a running retest to ensure the driver is continuing to drive sober.

An Ignition Interlock program is a tool to advance public safety, allow revoked or suspended drivers to regain driving privileges and maintain employment, and assist those individuals who desire to address a drinking problem.

Why Choose LifeSafer®?

Sometimes life takes a wrong turn. LifeSafer Devices combined with our expert team of Service Providers can guide you as you **Get Back on the Road Legally and Safely.**

Highest Level of Experience

LifeSafer has been the ignition interlock industry leader for 20 years. Our experienced Service Providers have guided more than 500,000 people through their mandated programs.

Superior Customer Care

Available and responsive **24/7 customer service.** Our caring and experienced Service Providers will always treat you with the utmost courtesy and respect.

Affordable

The LifeSafer Interlock Device costs less than a cafe grande or a drink in a bar per day.

Reliable, Easy-to-Use Devices

LifeSafer interlocks are state approved and use alcohol-specific fuel cell technology for the highest level of accuracy and reliability. The LifeSafer FC100 Interlock is the most widely used interlock in the U.S, and was the first interlock to meet National Highway Traffic Safety Association standards.

What to Expect When you Install an Interlock...

1. Call us at 1-800-671-8054 and we'll help you locate a LifeSafer Service Provider, answer any questions you may have, and schedule an appointment for installation.
2. Your Service Provider will install the device while you wait. Allow about an hour for installation and training.
3. Once the Device is installed, you will be trained on proper use of the interlock and will practice taking the test several times so you are comfortable with it before leaving the Service Provider's location.
4. Your Service Provider will review the terms and conditions of your program with you and answer any questions you may have.
5. Your Service Provider will collect payment for your first monitoring period and schedule your next monitoring appointment at that time. Monitoring is usually scheduled every 30 - 60 days, depending on your program requirements.
6. Should you have any questions or issues with the Device contact your LifeSafer Service Provider or call our 24-hour customer service at 1-800-671-8054.
